

Advertising Industry Report 2020

ADVERTISING INDUSTRY KEY TAKEAWAYS

- ❑ **Advertising revenues** are expected to increase at an annualized rate of 4.8% over the next five years, reaching \$69.2 billion in 2025. As companies adapt to benefits from the growth of digital platforms, clients will seek integrated marketing solutions that combine multiple media outlets, resulting in more demand for industry services.
- ❑ **External Drivers**
 - **Total Advertising Expenditure:** Trends in **total mainstream media advertising**, particularly in radio, TV, newspapers and magazines, have a direct effect on this industry. Growth in total US advertising expenditure indicates that businesses are more willing to incur advertising expenses, which benefits advertising agencies.
 - **Corporate Profit:** As businesses become more profitable, they often expand their advertising budgets due to many digital advertising services bringing in a strong return on their investment. As a result, a rise in corporate profitability, particularly in the **retail, finance, automotive and telecommunications sectors**, will stimulate demand for advertising services.
 - **Digital Media:** The fragmentation of the media landscape has expanded the **mediums and methods** by which consumers interact with brands. Growing client demand for digital advertising and marketing campaigns has forced established companies to adapt; evidenced by a growing strategic focus on enhancing digital capabilities.
- ❑ **Industry Outlook**
 - **Continued Growth:** Over the five years to 2025, the Advertising Agencies industry is expected to continue growing, as the proliferation of digital mediums, such as tablets and smartphones, provide new revenue streams. Growth will also be driven by an increase in demand for value-added in-house services, such as marketing and public relations, which helps industry clients develop a unified brand message both domestically and globally
 - **Emerging Trends:** Viral marketing has become possible through increasing social media use and popularity. Unlike most online advertisements, which charge clients based on the number of consumer clicks, viral advertisements are passed from user to user via e-mail or social networking sites.
